

SUBIN P K

Full-Stack Web Developer (Python | Django | React.js)

Kannur, Kerala, India | +91 9496313744 | subinsuresh8088@gmail.com | github.com/subinpk | linkedin.com/in/subin-pk

PROFESSIONAL SUMMARY

Full-Stack Web Developer with 1.5+ years of professional experience designing, building, and deploying production-grade enterprise web applications using Python, Django, and Django REST Framework. Skilled in architecting secure backend systems including Role-Based Access Control (RBAC), RESTful APIs, and normalized relational database schemas (PostgreSQL, MySQL), with proven results reducing query latency by 35%. Experienced collaborating in agile, cross-functional teams to own features end-to-end, integrating responsive React.js and Bootstrap 5 frontends with scalable backend systems. Immediately available for full-time on-site or remote roles.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), RESTful API Design, Role-Based Access Control (RBAC), Django MVT Architecture

Frontend: React.js (Component Design & State Management), JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Responsive UI

Databases: PostgreSQL, MySQL, Django ORM Optimization, Database Schema Design

Tools & Deployment: Git, GitHub, VS Code, Vercel, Render, AWS, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Software Developer — Altos Technologies, Kochi, Kerala

Jun 2024 – Sep 2025

- Developed, tested, and maintained production-deployed Django backend modules for enterprise applications within a high-velocity 4-person team, accelerating feature delivery by owning tasks end-to-end from design through deployment.
- Engineered an enterprise-grade Role-Based Access Control (RBAC) system with multiple granular permission tiers, securing sensitive business data across the platform.
- Designed normalized relational database schemas in PostgreSQL and MySQL; optimized slow ORM queries and indexes, reducing data retrieval latency by 35% for high-frequency reporting views.
- Built secure, well-documented RESTful APIs using Django REST Framework, improving data synchronization efficiency between frontend clients and third-party integrations.
- Collaborated with frontend developers and QA to integrate Bootstrap 5 components with backend workflows, eliminating cross-device rendering bugs prior to launch.
- Participated in the full CI/CD deployment pipeline, shipping stable production builds to live cloud environments.

Python Full-Stack Intern — STC Technologies, Kochi, Kerala

2023 – 2024

- Built and maintained core CRUD-based web applications using Django's MVT pattern, contributing directly to client-facing deliverables from week one.
- Streamlined data management pipelines using Django ORM, eliminating redundant database queries and reducing server overhead.
- Created mobile-first, responsive UI layouts using HTML5, CSS3, and Bootstrap 5, improving user experience metrics on internal corporate tools.

KEY PROJECTS

ERP Billing & Inventory Management System

Python, Django (MVT), MySQL, Bootstrap 5, JavaScript

- Independently engineered a production-ready enterprise platform handling live retail billing, supplier tracking, and real-time inventory adjustments.
- Built a high-performance PDF invoice generation engine via Django views, enabling instantaneous, data-accurate document generation upon transaction completion.
- Programmed automated real-time inventory synchronization logic to recalculate stock levels instantly on sales/purchases, eliminating oversell scenarios.
- Designed the complete MySQL schema, balancing strict normalization with targeted query optimization for heavy reporting demands.

Retail Management & Online Ordering System

Python, Django (MVT), MySQL, Bootstrap 5, JavaScript

- Developed a full-cycle e-commerce backend featuring dynamic product catalog management and automated stock tracking.
- Architected a client-session-based active cart system, ensuring seamless state retention and checkout persistence across user sessions.
- Implemented secure user authentication with Django's built-in framework, robust password hashing, and login-protected route guards.
- Deployed the application to a live staging environment, collaborating with QA to systematically resolve pre-launch bugs.

EDUCATION

Bachelor of Computer Applications (BCA)

Expected 2029

Yenepoya University — Flexible learning mode; 100% immediate availability for full-time roles

Diploma in Computer Hardware Engineering

EKNMPTC Model Polytechnic, Kerala
